

JOB DESCRIPTION - Tech Engineering Intern

Company : MoneyMatch Sdn Bhd (www.moneymatch.co)
Position : Tech Engineering Intern
Reports to : Tech Development Lead
Location : Kuala Lumpur, Malaysia
Salary : RM500

The Role

The Technology Engineering Intern will be responsible for writing clean, maintainable, and reusable server-side code in PHP / Laravel while fixing minor front-end HTML5, CSS, and Javascript issues. The intern is also required to test and document the results of the testing. This internship role in a leading FinTech startup will also involve working with the team in any related administrative and general requirements of the business as and when required (we're a fast scaling startup so everyone chips in!! This include interns.)

Requirements:

- Possess or currently pursuing a Bachelor's degree or above in IT, Computer Science, Software Engineering, Product Management, Data Science or equivalent.
- Has a love for numbers, puzzles, and logic
- Experience in HTML5, Javascript, CSS, and MySQL is an advantage
- Candidates must be innovative, confident, accountable & have a strong sense of self-initiative

Earliest Starting Date : 1st July 2017
